

MELTOMAT®

Application Machine

Special Advantages:

- ✓ Small and flexible.
- ✓ Cost-effective, especially for smaller jobs.
- ✓ Easily transported.

MELTOMAT® is the "piccolo" of sealant heaters.

For a century now, DENSO Group Germany represents experience, quality and reliability for corrosion prevention and sealing technology. The success of the internationally leading corporation is based on the development of the "DENSO-Tape", which was already patented in 1927 as the first product worldwide for the passive corrosion prevention of pipelines. Since then, the DENSO Group Germany establishes and guarantees the highest quality standards with technically trend-setting products. Research, development and production take place exclusively in Germany. Our employees continuously implement safe and individual solutions in a personal cooperation with the customer.

Product Description/Usage

The MELTOMAT® is especially suitable for heating TOK®-Melt, the DENSO

sealing compound for small-surface and small-volume construction work.

Technical Data

Net capacity: 10 l

Heated using a propane gas burner (gas not included in delivery)

Hand-operated mixer unit

Weight: 28 kg
